

ESTADO GENERAL.

Por el Mar del Norte ha aparecido una borrasca de alguna intensidad. En el centro de la Península hay un área de presiones débiles que produce algunas tormentas locales en el centro y costa Cantábrica, pero en el resto el tiempo es bueno con vientos bonancibles de dirección variable. Las presiones más elevadas residen en el Atlántico. La temperatura máxima de ayer fue de 38° en Córdoba y la mínima de hoy ha sido de 12° en Teruel.

Tiempo probable.

EN EL N. Vientos bonancibles a frescos de la región del N. y lluvias
 N.W. " frescos del 1º cuadrante y tiempo incierto
CENTRO " flojo y bonancibles y buen tiempo con tendencia al régimen tormentoso
S. " bonancibles a frescos del 3º cuadrante y buen tiempo
E. " flojos y bonancibles de dirección variable y buen tiempo
N.E. " bonancibles del 1º cuadrante y tiempo incierto.

Observaciones de la mañana.
