En rojo - Curvas normales de igual presión del mes.
En negro - Curvas de igual presión del día á 8h.
En negro - Curvas de igual variación de presión desde la víspera.

Estado atmosférico

á 8h

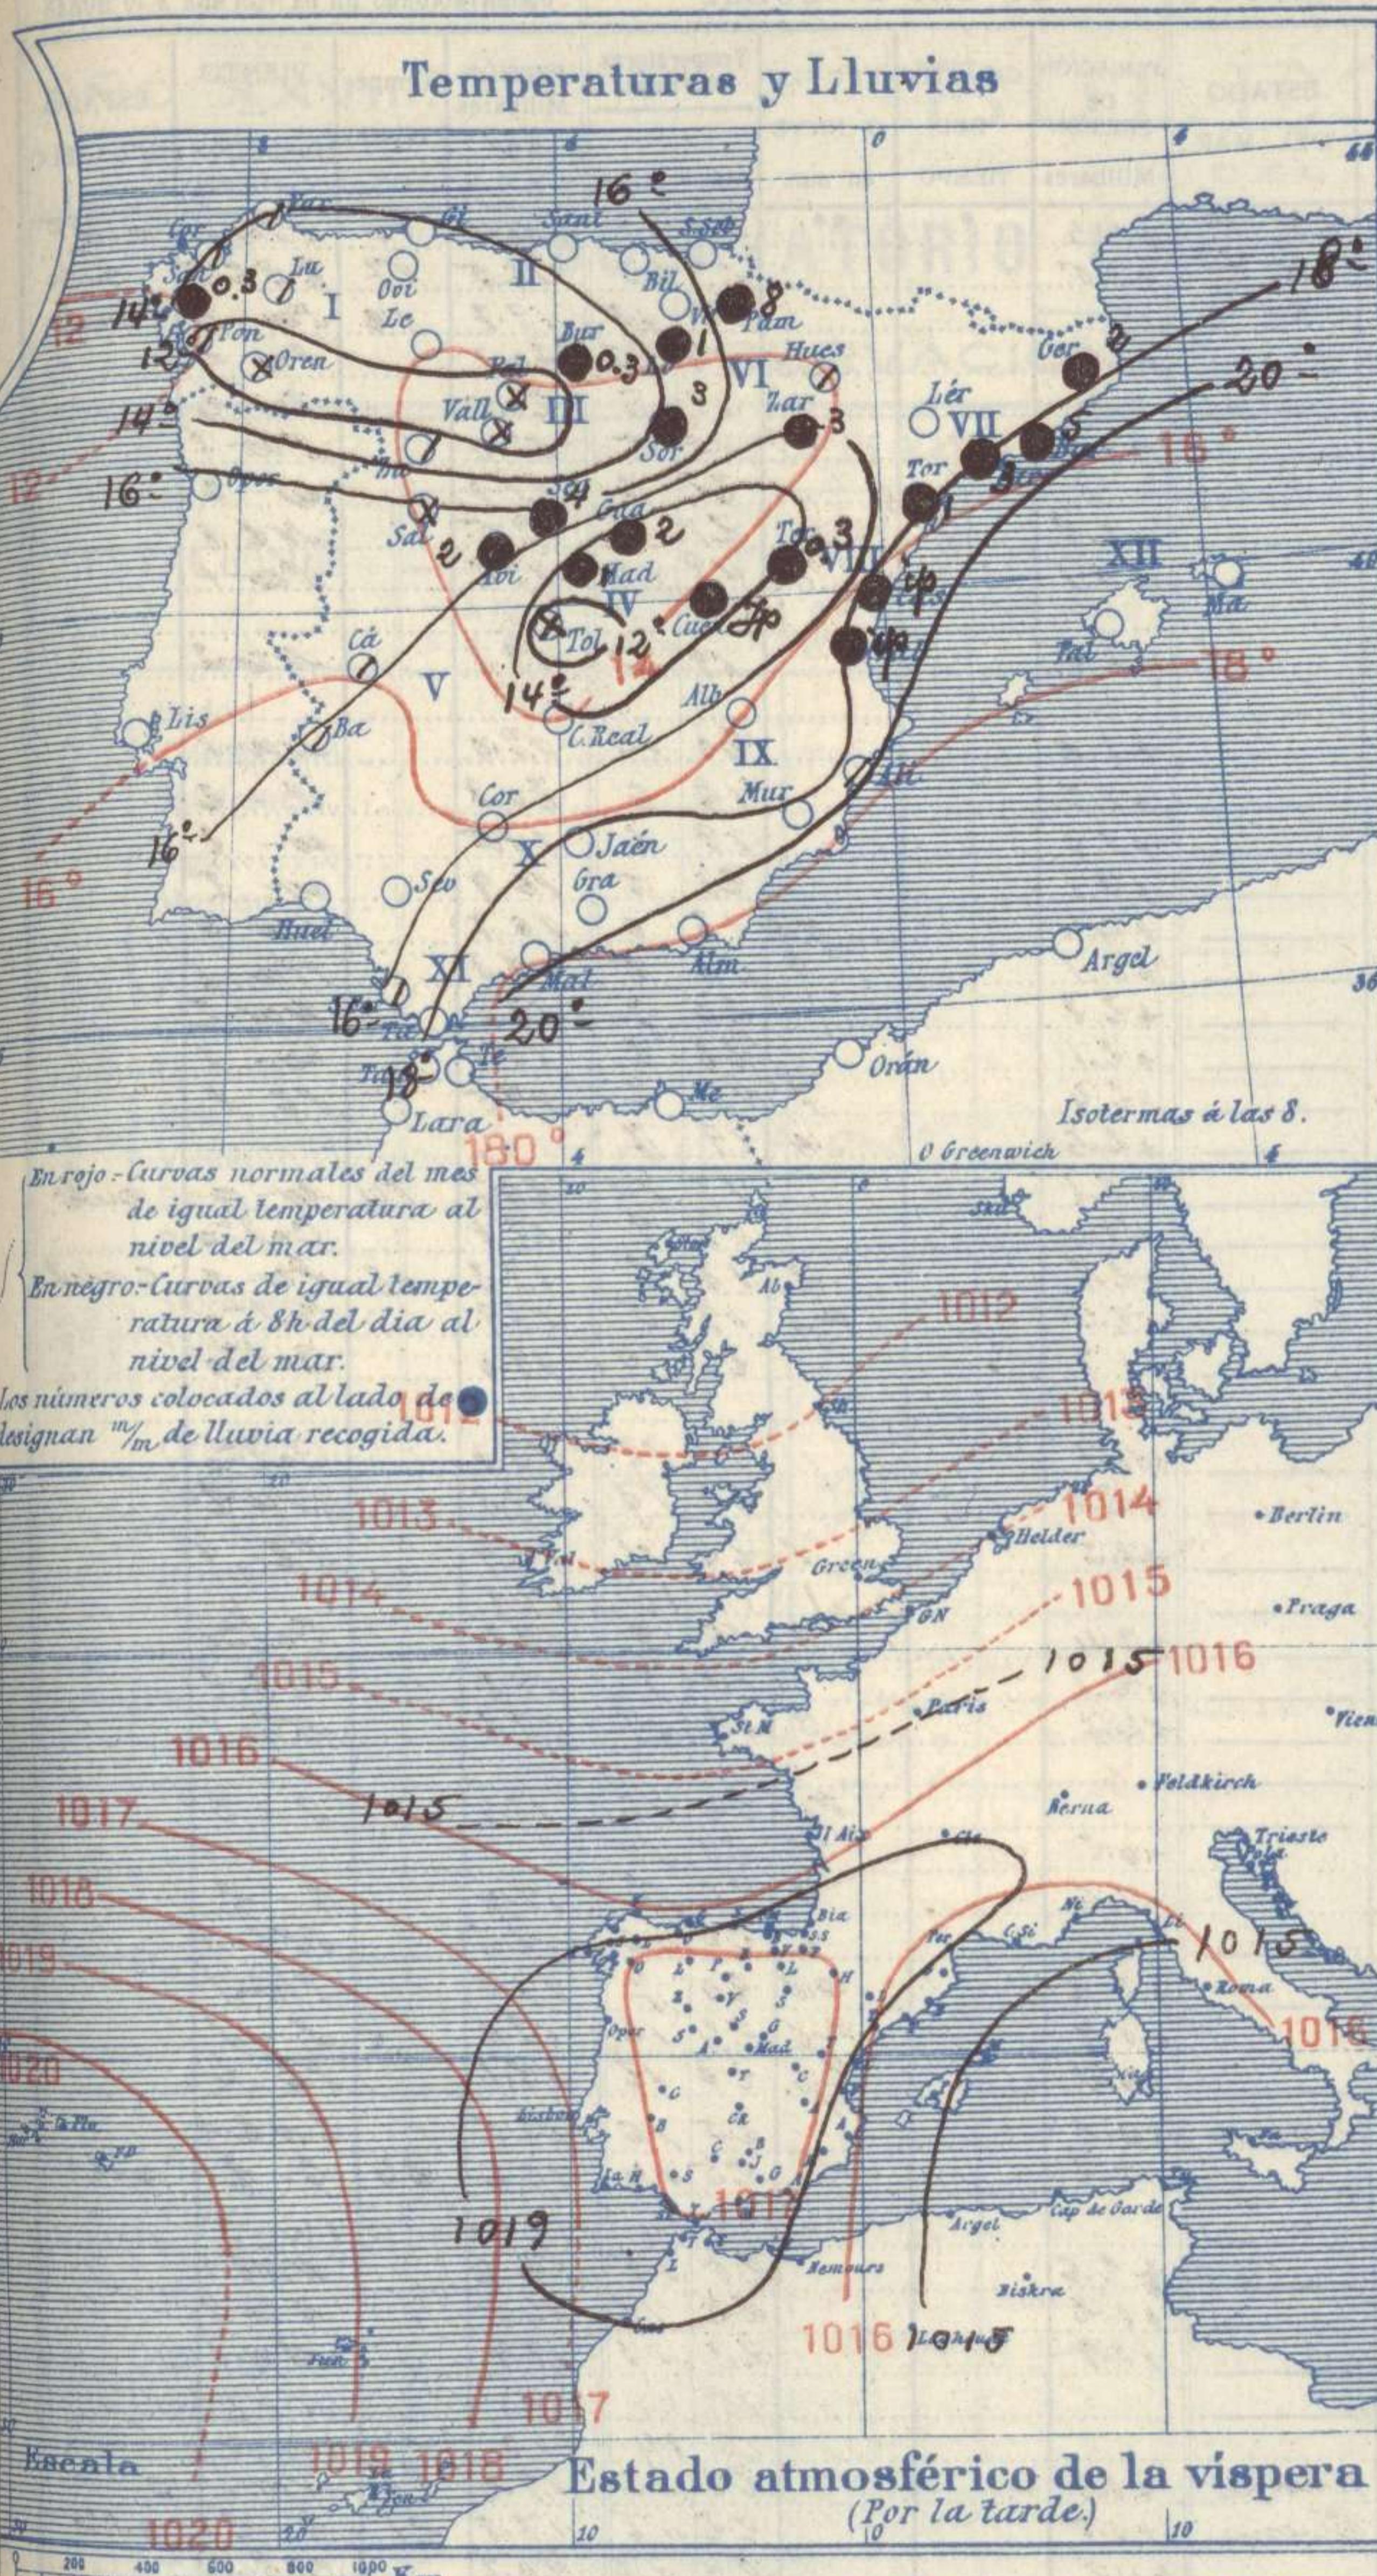

Estado general

Se retiran de España los centros de perturbación atmosférica que produjeron durante las últimas 24 horas lluvias en la Meseta Central, Aragón, Cataluña y Levante.

Dominan los vientos flojos de dirección variable y la temperatura va manteniéndose dentro de lo normal: la máxima de ayer fue de 26 grados en Jaén y la mínima de hoy ha sido de cero grados en
