

ESTADO GENERAL

La depresión de las Azores ha bajado de nivel 2^m y se ha encaminado hacia el S.E. hallándose hoy cerca de Madeira. Shuvo en el Atlántico y el mínimo parece que se aproxima a la Península. En esta el tiempo es bueno, menos en el Cantábrico. Ha llovido en Cataluña y las Baleares, con bajas temperaturas. Una depresión de cierta importancia está en el mar del N. Las presiones más elevadas residen en el Océano al S.W. de las islas Británicas.
