

**ESTADO GENERAL.**

Al W de las costas de Marruecos persiste un área de presiones débiles relativas por cuya causa sopla levante fresco en el Estrecho y costas adyacentes. En la Península el tiempo es bueno algo nebuloso en Galicia y los vientos son en general bonancibles del 1º cuadrante. Las presiones más elevadas se encuentran en Bretaña. La temperatura máxima de ayer fue de 35° en Badajoz y Cueva y la mínima de hoy, ha sido de 8° en Burgos Segovia, Tovia y Teruel

**Tiempo probable.**
