### ESTADO GENERAL

Entre Madeira y Marruecos sigue bajando la presión y acentuándose el área de bajas presiones relativas. En la Península se han regularizado un poco las isobaras que vuelven a exararse, pero el tiempo tiende a cambiar de régimen por el influjo de una gran borrasca que se aproxima a Irlanda, donde ha bajado el barómetro  $20^m$  con vientos frescos del S. y lluvias. Cambian luego la baja barométrica a las Azores.

### Tiempo probable

EN EL N vientos bonancibles a frescos del S. cuadrante y lluvias.
