## Signos convencionales

| Fuerza del viento         | Cielo       | Mar             |
|---------------------------|-------------|-----------------|
| 0 Calma                   | ○ Despejado | Llana           |
| 1 Ventolina               | ○ Con nubes | Rixada          |
| 2 Muy flojo               | ○ Bruma     | Marejada        |
| 3 Flojo                   | ○ Niebla    | Picada          |
| 4 Bonancible (Moderado)   | ○ Nieve     | Marejada gruesa |
| 5 Fresquito (Algo fuerte) | ● Lluvia    | Gruesa          |
| 6 Fresco (Fuerte)         | ○ Tormenta  | Muy gruesa      |
| 7 Duro                    |             | Arbolada        |
| 8 Muy duro                |             | Muy arbolada    |
| 9 Temporal                |             |                 |

## Presión atmosférica y vientos

## Estado general

Al Occidente de las costas Gallegas se encuentran las presiones débiles ( $760 \text{ m/m}$ ) hallándose las altas en el mar Mediterráneo ( $772 \text{ m/m}$ ), debido a esta disposición de las presiones, aumentó la fuerza del Levante en las costas adyacentes al estrecho de Gibraltar, en el cual está bastante agitado. Durante las últimas 24 horas llovió en las provincias levantinas y en toda España el cielo aparece con muchas nubes. La temperatura máxima de ayer fue de 17 grados en Sevilla y Jaén y la mínima de hoy ha sido de 7 grados bajo cero en Zaragoza.

5 de Enero de 1918
