Señor
Jefe del Observatorio Central Meteorológico
Parque del Retiro

Madrid. (ESPAÑA)

Apartado n.º 285.

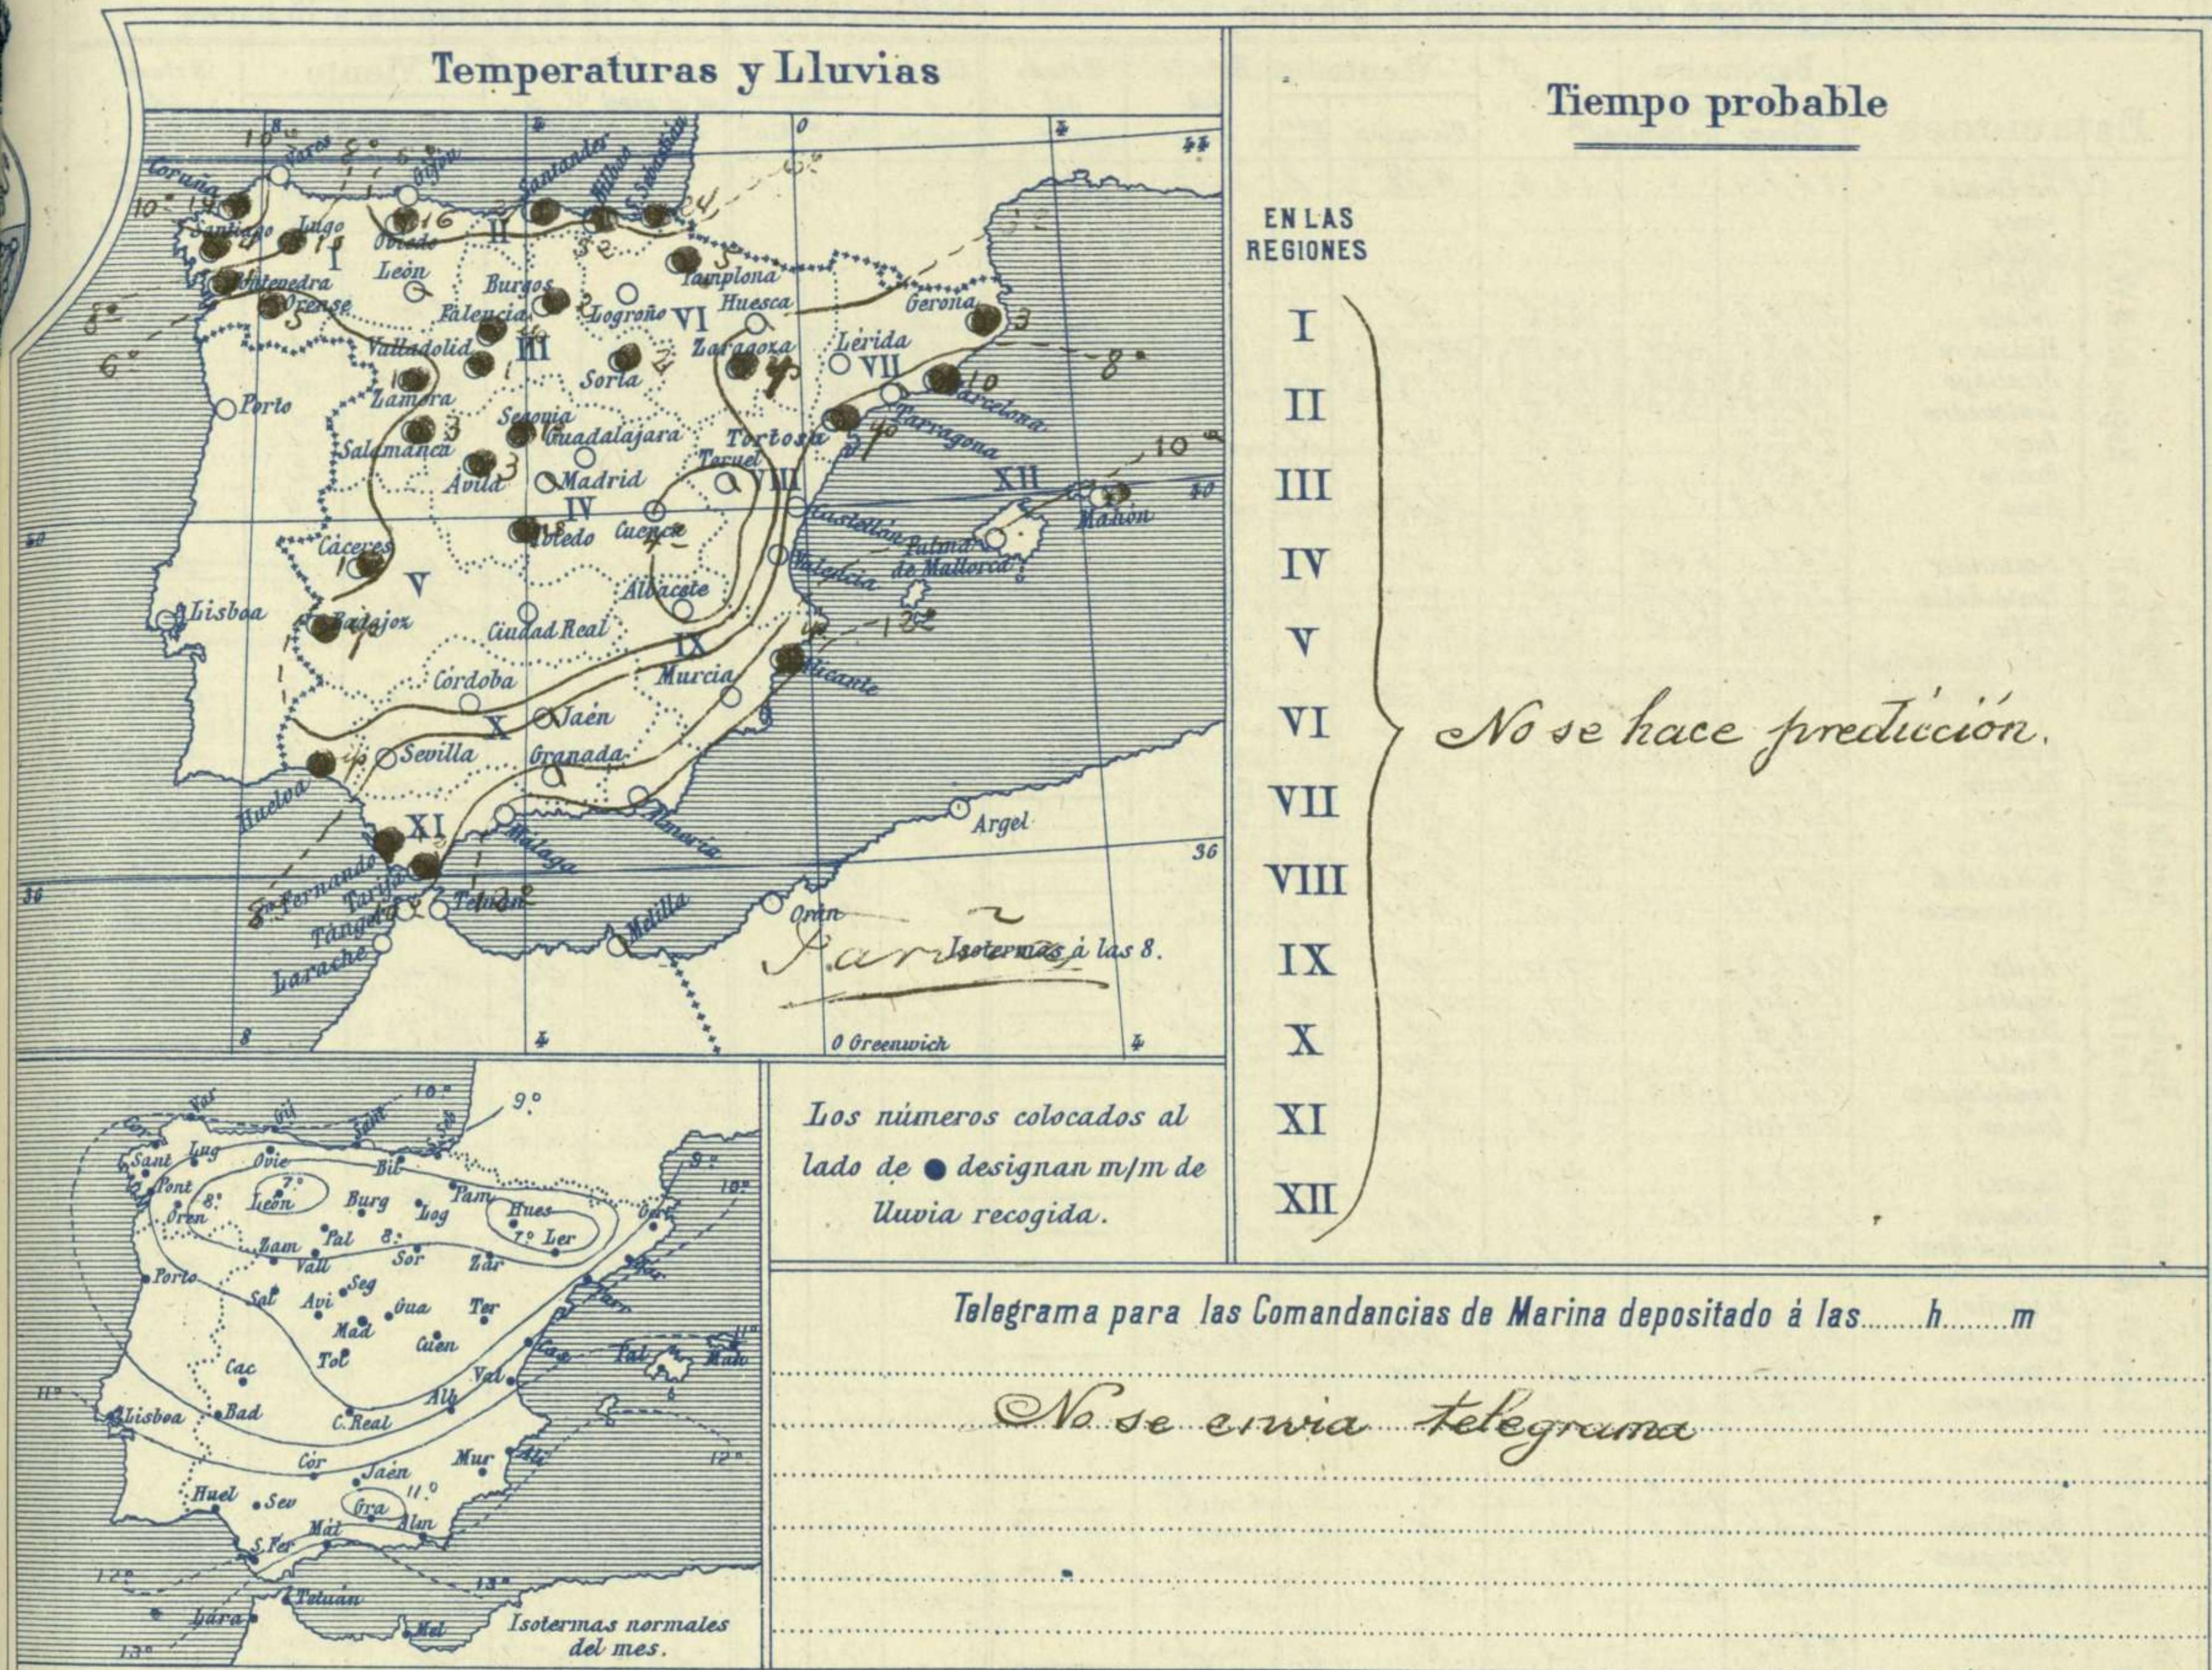

Las presiones débiles se alejan hacia Oriente y se establecen las altas sobre el Atlántico, desde Portugal a las Azores. En Cantabria y Galicia las lluvias fueron grandes (Bilbao 32 mm), Santander 27 mm) y por el resto de España carecieron de importancia. Dominan los vientos del Oeste. La temperatura máxima de ayer fue de 19 grados en Alicante y Murcia y la mínima de hoy ha sido de 3 grados bajo cero en Teruel. Hay marejada en el Cantábrico.
