

ESTADO GENERAL

Sube el barómetro en Irlanda y disminuye la fuerza del Temporal. En la Península es general el mal tiempo con lluvias copiosas. En el golfo de León se ha formado un mínimo secundario con baja barométrica de 9^{mm} que ha causado grandes lluvias y tormentas en Provenza, Cataluña y las Baleares. Los vientos son frescos del S.W. en casi todas partes. Las presiones más elevadas residen en las Azores, donde sigue bajando el barómetro. El calor disminuye en Andalucía.

Tiempo probable

vientos bonancibles a frescos del 3^{er} cuadrante y lluvias
