Observaciones aerológicas

Estado General

En el Paso de Calais y Mar del Norte se halla el centro principal borrascoso que actúa en Europa; otro núcleo se halla en el Mediterráneo Superior y ambos constituyen una perturbación atmosférica importante que produce mucho viento por toda Europa, nevadas y aguaceros. En nuestra zona Cantábrica sopla con fuerza el viento del 4º cuadrante y llueve; por todas partes el cielo está con muchas nubes.

Tiempo probable

EN LAS REGIONES

I vientos fuertes del Norte y lluvias. Marejada.

II

III

IV

V

VI vientos fuertes y moderado de la región del Norte y algunos aguaceros y nevadas.

VII
