Señor
Jefe del Observatorio Central Meteorológico
Parque del Retiro

Madrid. (ESPAÑA)

Apartado n.º 285.

Estado general

Persiste al Occidente de Marruecos un área de presiones débiles relativas (762 mm) por lo cual se entabló el Levante en el Estrecho de Gibraltar y soplan los vientos del primer cuadrante en Andalucía.

El tiempo es bueno para toda España; el cielo aparece casi limpio de nubes, pues solo en Galicia y Cantabria está cubierto y la temperatura subió un poco durante las últimas 24 horas: la máxima de ayer fue de 34 grados en Sevilla y Córdoba y la mínima de hoy ha sido de 14 grados en Lugo, Palencia y Burgos.

Las presiones altas deben de hallarse hacia las islas Británicas.
