Nº 546

Año XVII

ESTADO GENERAL.

La borrasca de Gibranda permanece en el mismo lugar y con el mismo nivel (748^{mm}) por cuya causa continua el mal tiempo de lluvias y vientos duros del H^o cuadrante en Cantabria y Galicia; en el resto de la Península el tiempo en general es bueno aunque de vientos frescos del H^o cuadrante en el Centro. Las presiones mas elevadas residen por las Azores. La temperatura maxima de ayer fue de 34° en Valencia, y la minima de hoy ha sido de 4° en Burgos y Segovia.

Tiempo probable.
