Estado general

Vuelve a hacerse de mayor importancia la pequeña perturbación atmosférica que desde hace dos días está situada entre las costas del Golfo de Cádiz y las Occidentales de Marruecos, por lo cual no desaparece el Levante del estrecho de Gibraltar, antes bien tiende a persistir. El tiempo es bastante bueno para casi toda la península Ibérica de ambiente suave, cielo nuboso y vientos flojos de la región del Este.

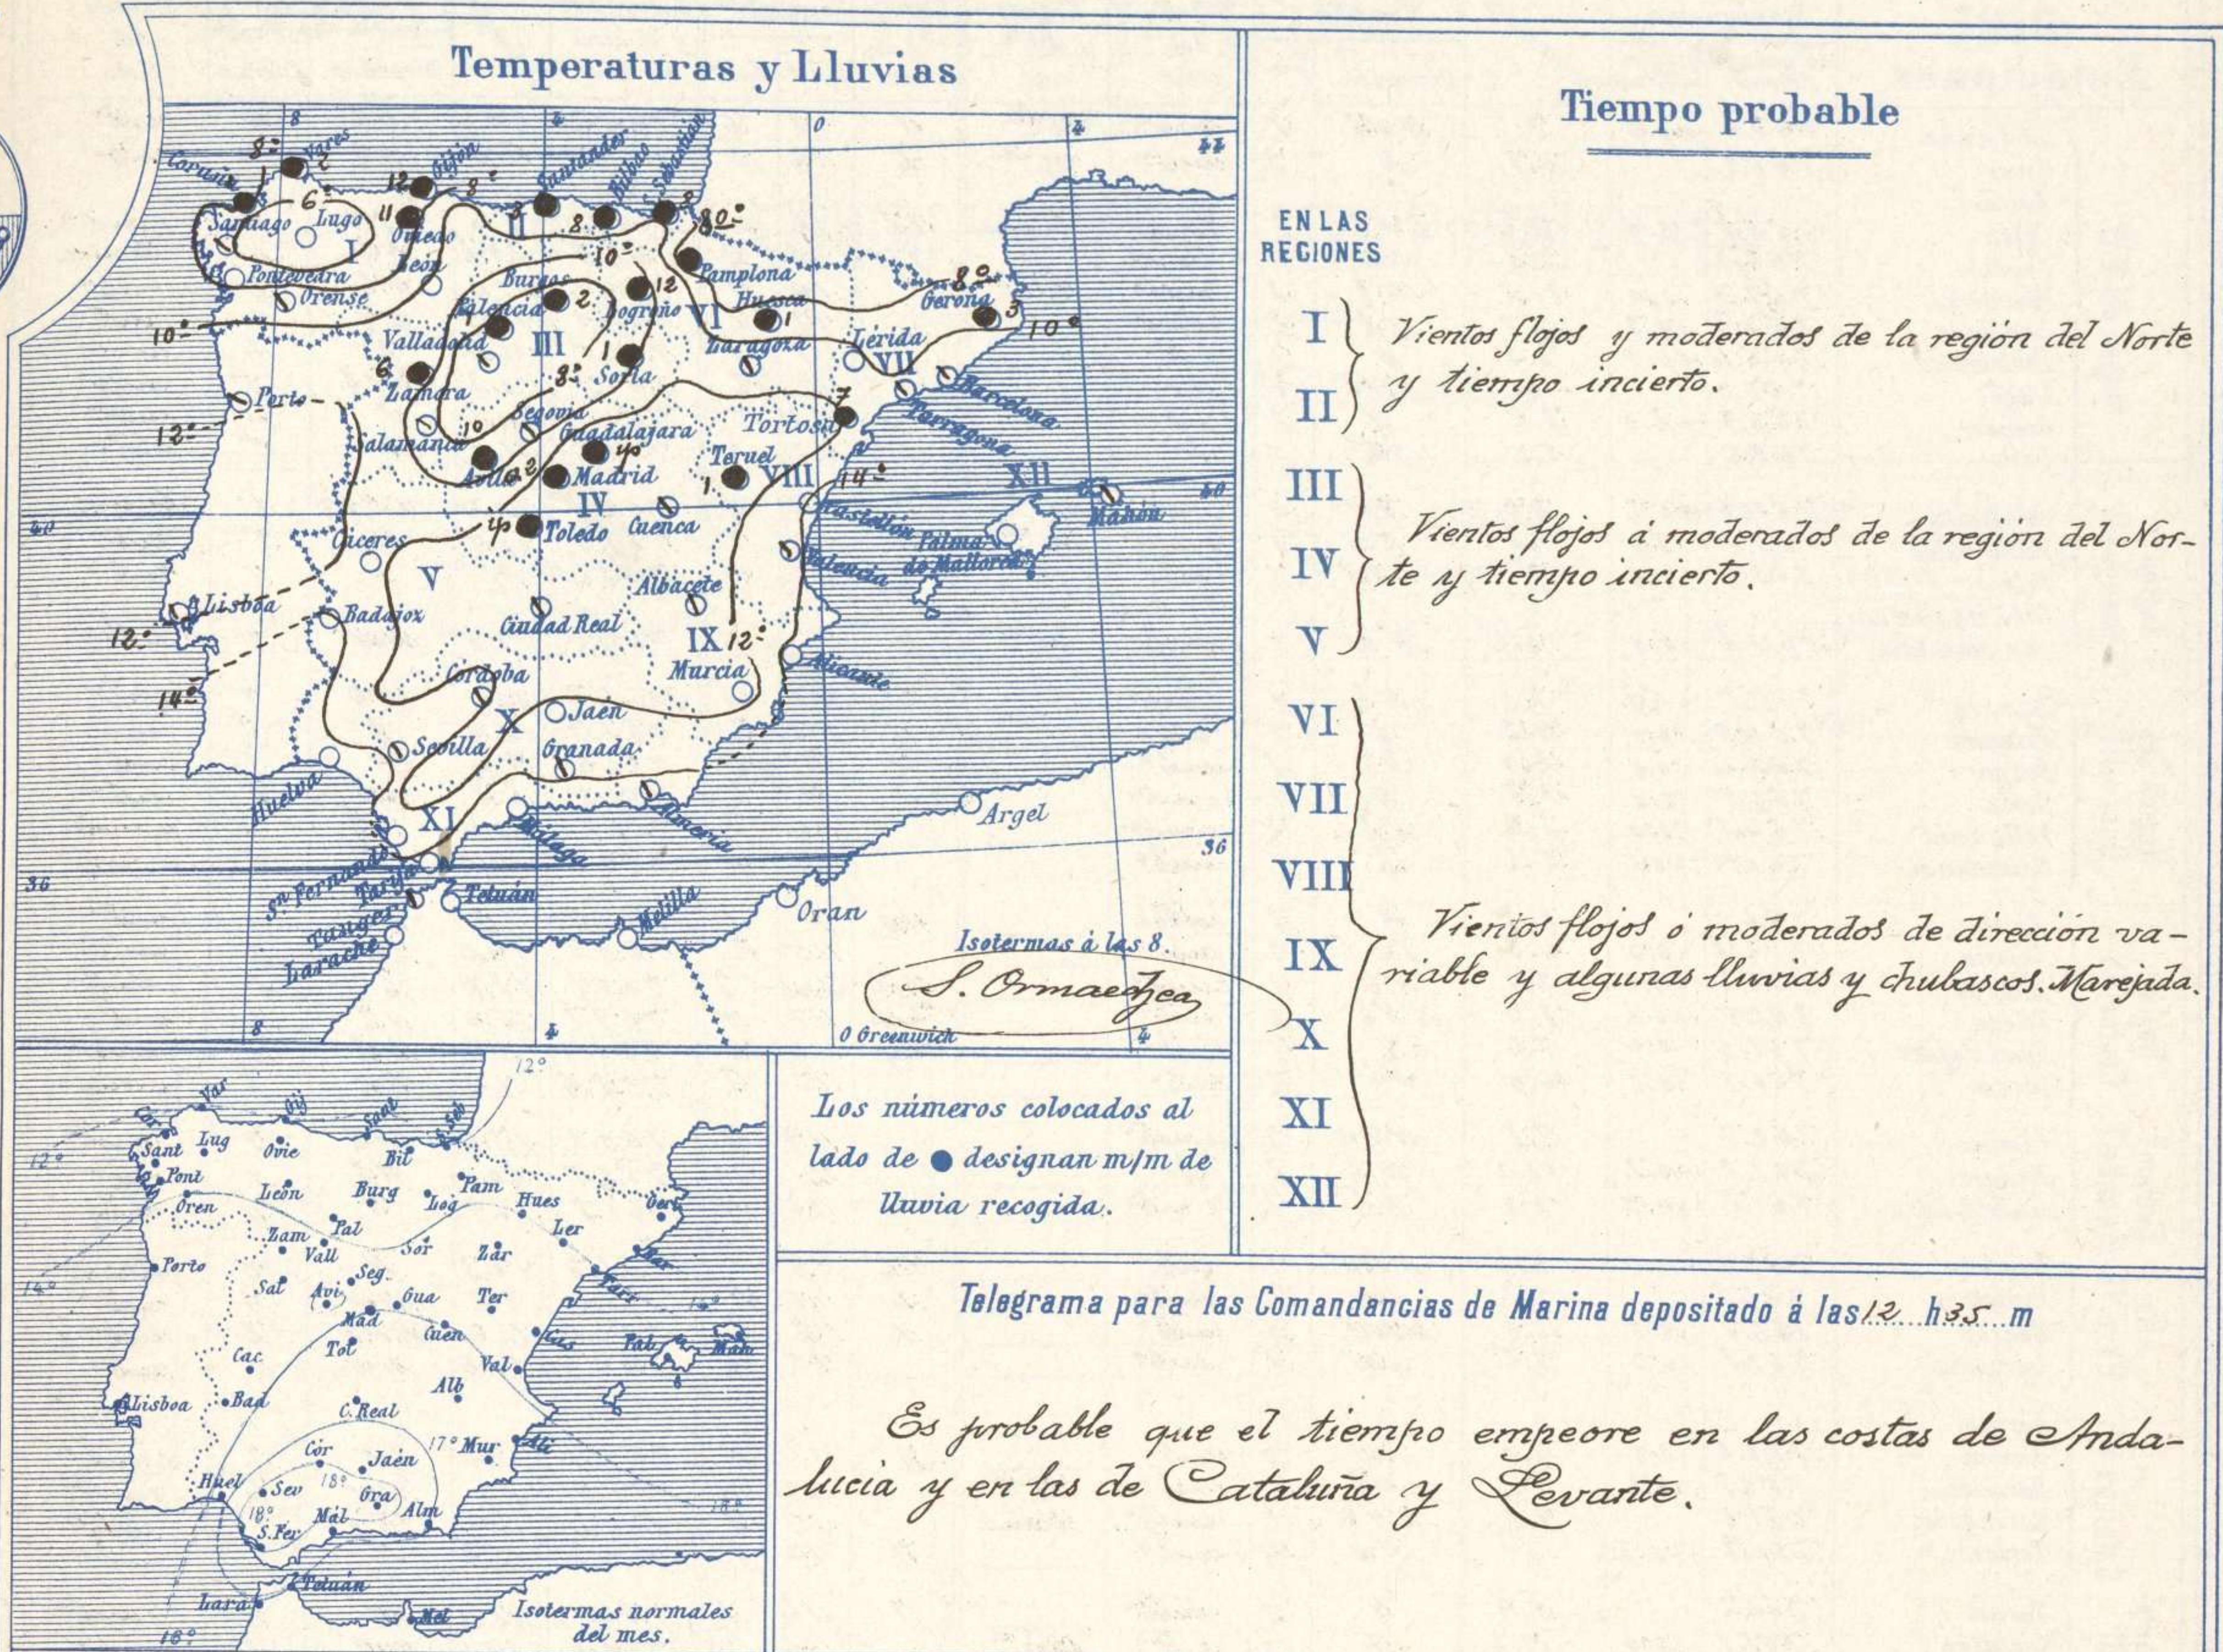

La temperatura máxima de ayer fue de 21 grados en Badajoz, Sevilla y Córdoba y la mínima de hoy ha sido de 1 grado en Burgos y Ávila.

Las presiones altas aparecen hoy situadas al Norte de las Azores.

Saravia
