

ESTADO GENERAL.

En el Mediterráneo Superior se halla el centro de una borrasca importante (745 mm) por cuya causa el mal tiempo de lluvias y vientos frescos se extiende por toda esta región; también en el Golfo de Gascuña el mar está agitado y llueve con vientos duros del Norte; pero en el resto de España el tiempo es en general bastante bueno. La temperatura máxima de ayer fue de 16° en Valencia y la mínima de hoy ha sido de 3° bajo cero en Teruel.

Tiempo probable.
