Señor
Jefe del Observatorio Central Meteorológico
Parque del Retiro

Madrid. (ESPAÑA)

Apartado n.º 285.

Estado general

Persisten las presiones débiles al Occidente de Europa desde las islas Británicas a las Canarias, por lo cual el tiempo ha mejorado poco al Oriente y centro de España y continúa lluvioso con vientos fuertes del Sur por las regiones gallega y Cantábrica.

El mar aparece agitado en las costas portuguesas, en las del Cantábrico y en el Mediterráneo superior.

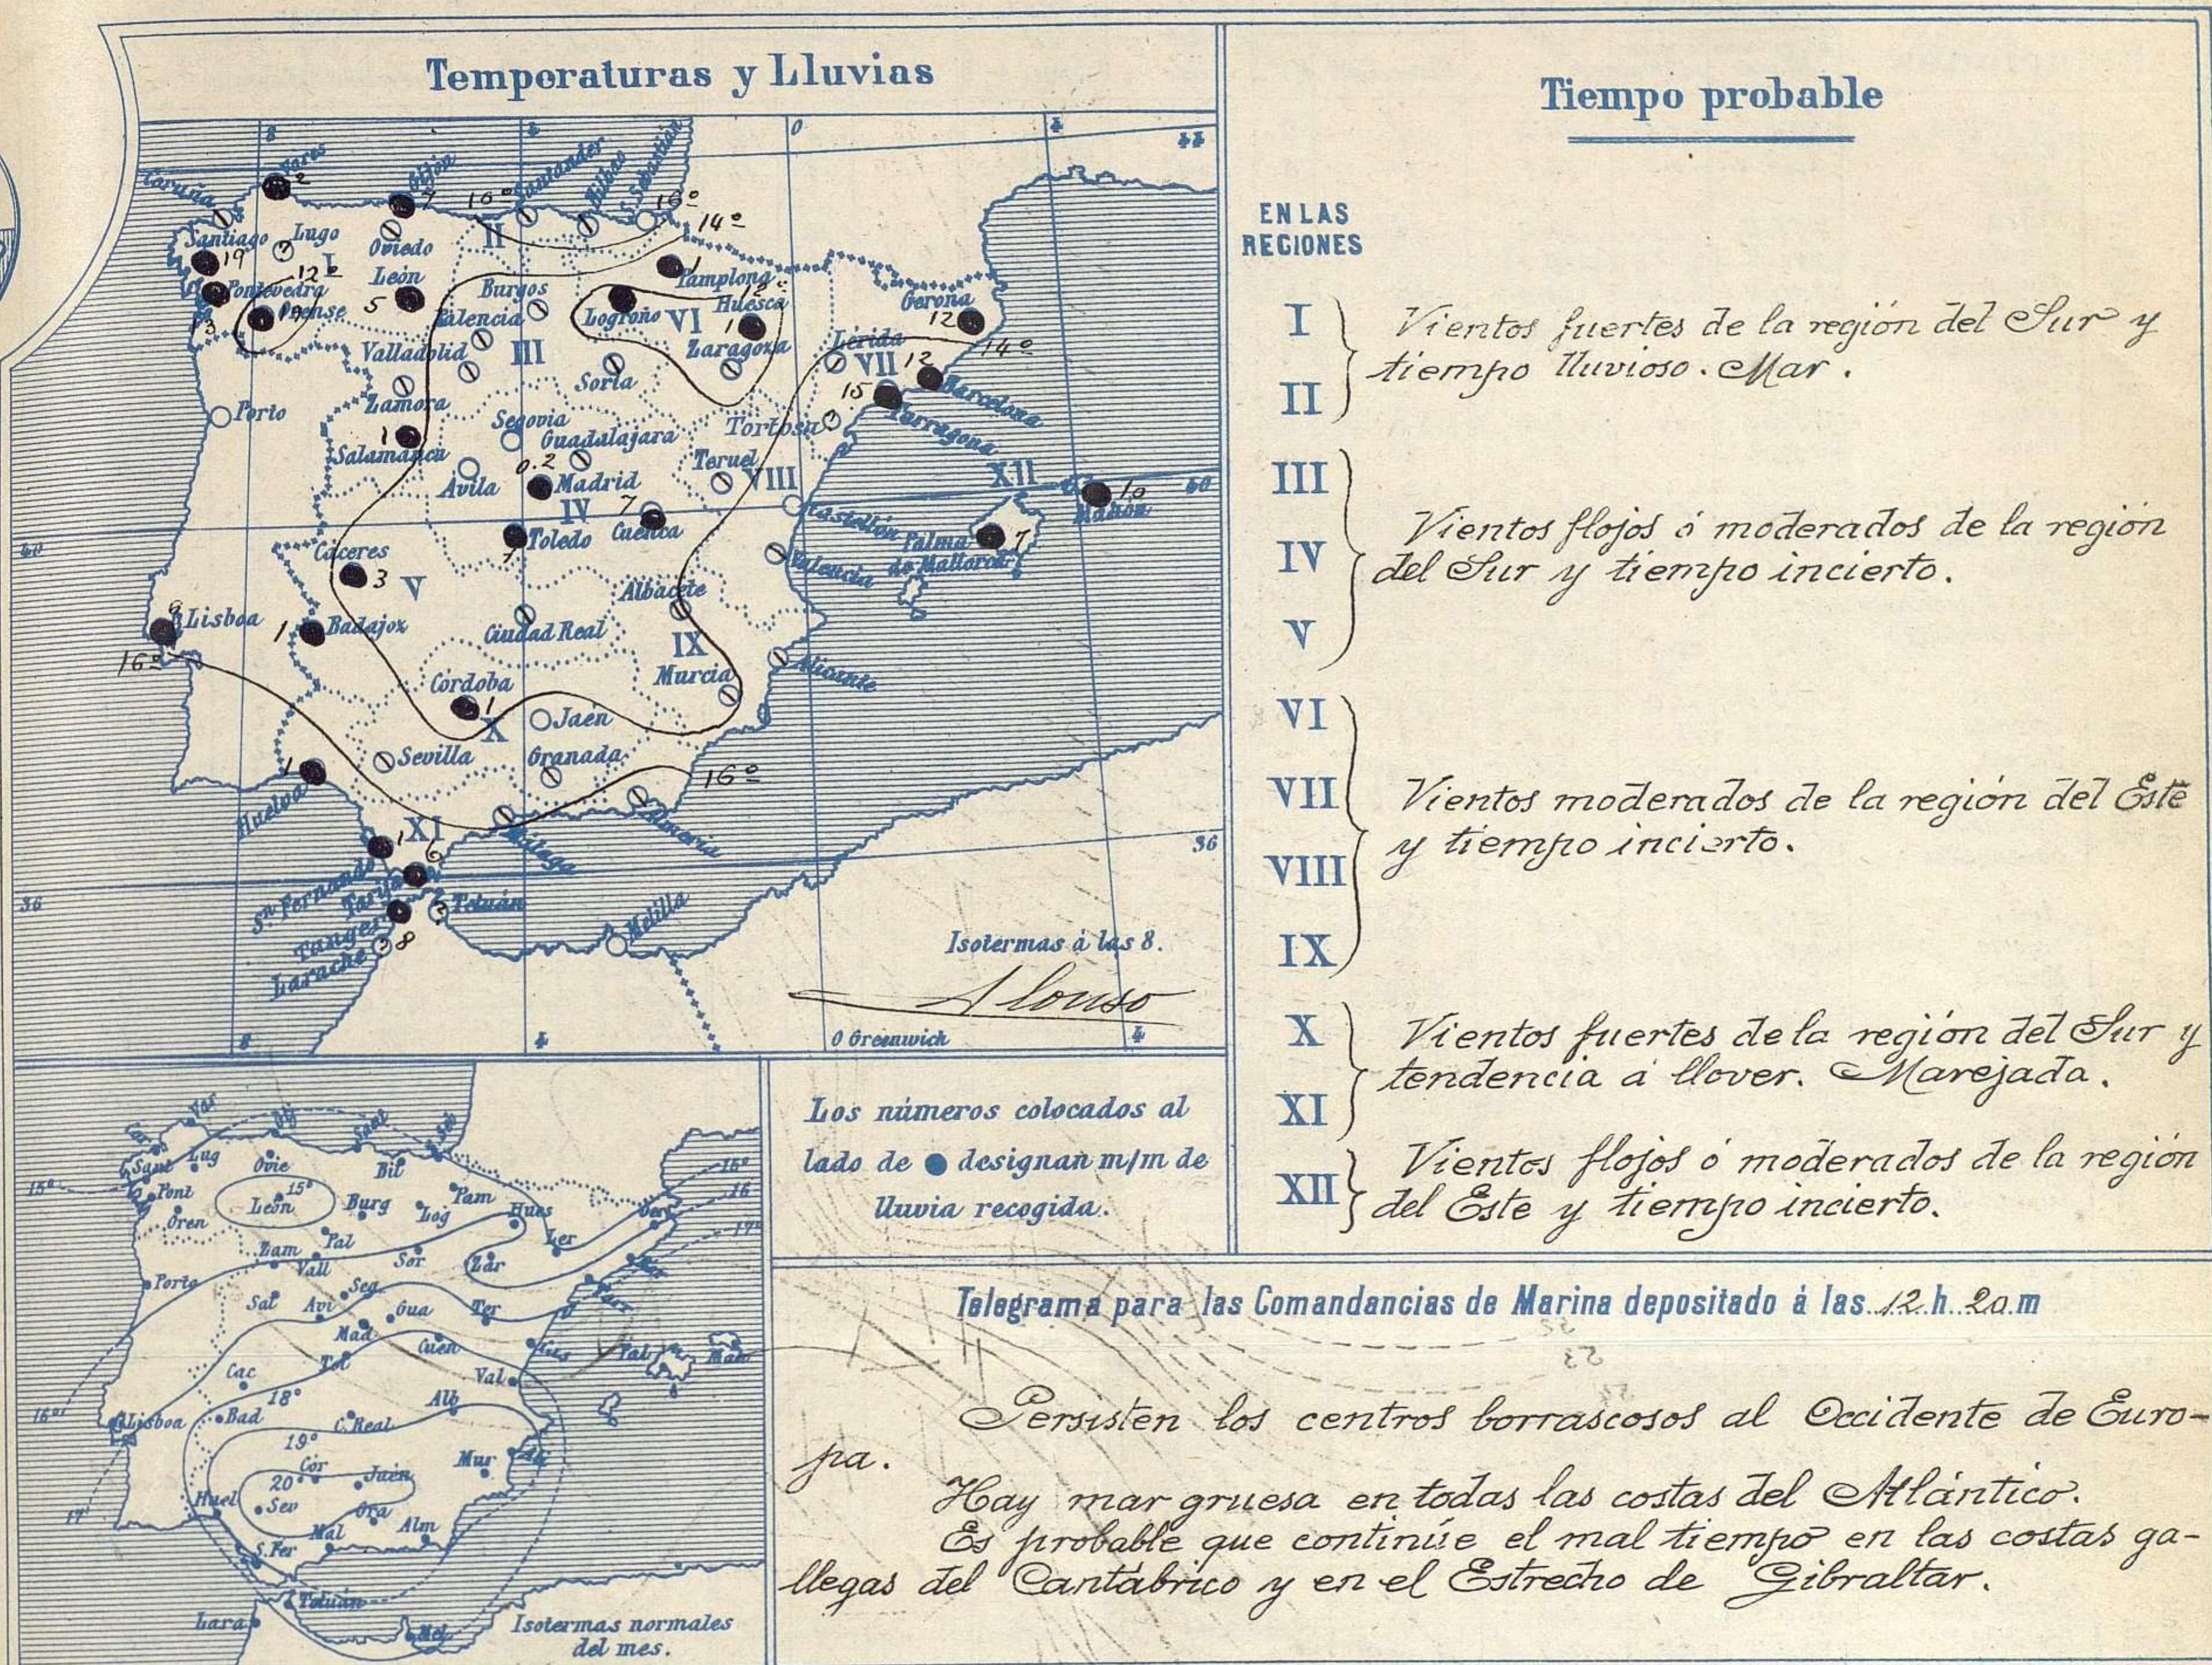

La temperatura máxima de ayer fue de 22 grados en Alicante y la mínima de hoy ha sido de 4 grados en Cuenca.

Las altas presiones residen sobre el Norte de África.

Sauca

de Octubre de 1913.

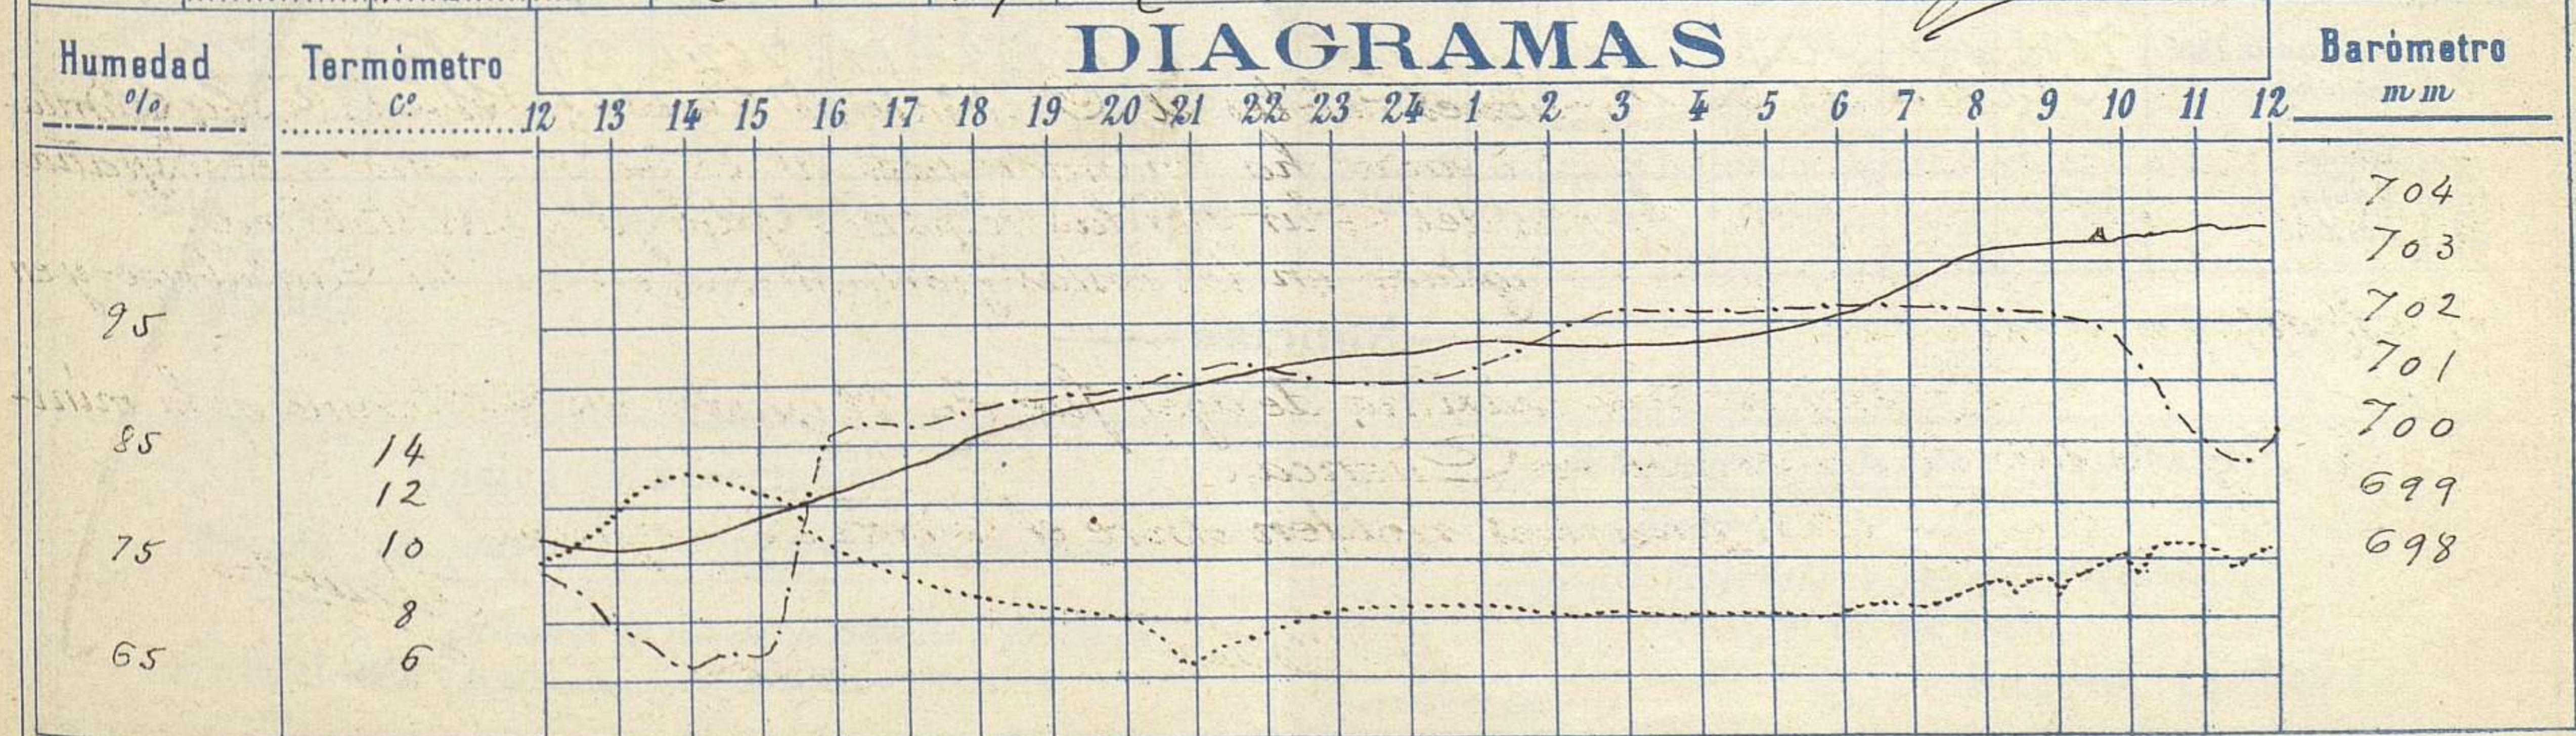

Num. 303

Observaciones de Madrid entre 12^h del dia 29 y 12^h del dia 30.
