

Una borrasca de nivel elevado pero de gran intensidad se halla al W. de las Azores y produce muy mal tiempo en el archipiélago de lluvias copiosas, vientos frescos del S. y mar arbolada. La borrasca de Irlanda todavía causa lluvias y vientos frescos del 2º cuadrante con mar gruesa. En toda la Península el tiempo es bueno, con ligera lluvia en algún punto de Galicia. Los vientos son flojos y bonancibles de dirección variable. Las presiones más elevadas residen en Cantabria y Galicia. La temperatura máxima fue ayer de 31º en Murcia y la mínima de hoy de 4º en Burgos, Segovia y Loria.

Tiempo probable.
