

INSTITUTO CENTRAL METEOROLÓGICO

Boletín del Lunes 17 de Mayo de 1909

Año XVII

Nº 137

ESTADO GENERAL.

El centro de mínimas presiones se halla hoy en el Norte de Francia con lluvias copiosas y vientos bonancibles; un secundario se encuentra por Perpignan y Barcelona que produce lluvias que descargarán en la mayor parte de la Península con vientos bonancibles a frescos del 3º y 4º cuadrantes. Suben las presiones y las mas elevadas residen en las Canarias y el Atlántico. La temperatura máxima fue ayer de 23º en Almería y la mínima de hoy ha sido de 7º en Segovia.

Tiempo probable.

EN EL N.	vientos bonancibles del 4º cuadrante y tiempo incierto
N. W.	" " " 3º cuadrante y algunas lluvias
CENTRO	" " variables y tiempo incierto
S.	" " del E y buen tiempo
E.	" " " " " " " "
N. E.	" " " " " " " "
