El barómetro, Amor de Dios 15, Madrid

Faltan los telegramas del Atlántico. Toda la Península se encuentra bajo el influjo de un área de presiones débiles que tiene su centro en la provincia de León; llueve en Cantabria y Galicia moderadamente pero en León se han recogido 36 mm; en el resto el tiempo es bueno. Los vientos son bonancibles y frescos de dirección variable. Las presiones más elevadas deben de encontrarse por las Azores. La temperatura máxima de ayer fue de 36° en Sevilla y la mínima de hoy ha sido de 9° en Teruel.

Tiempo probable.
