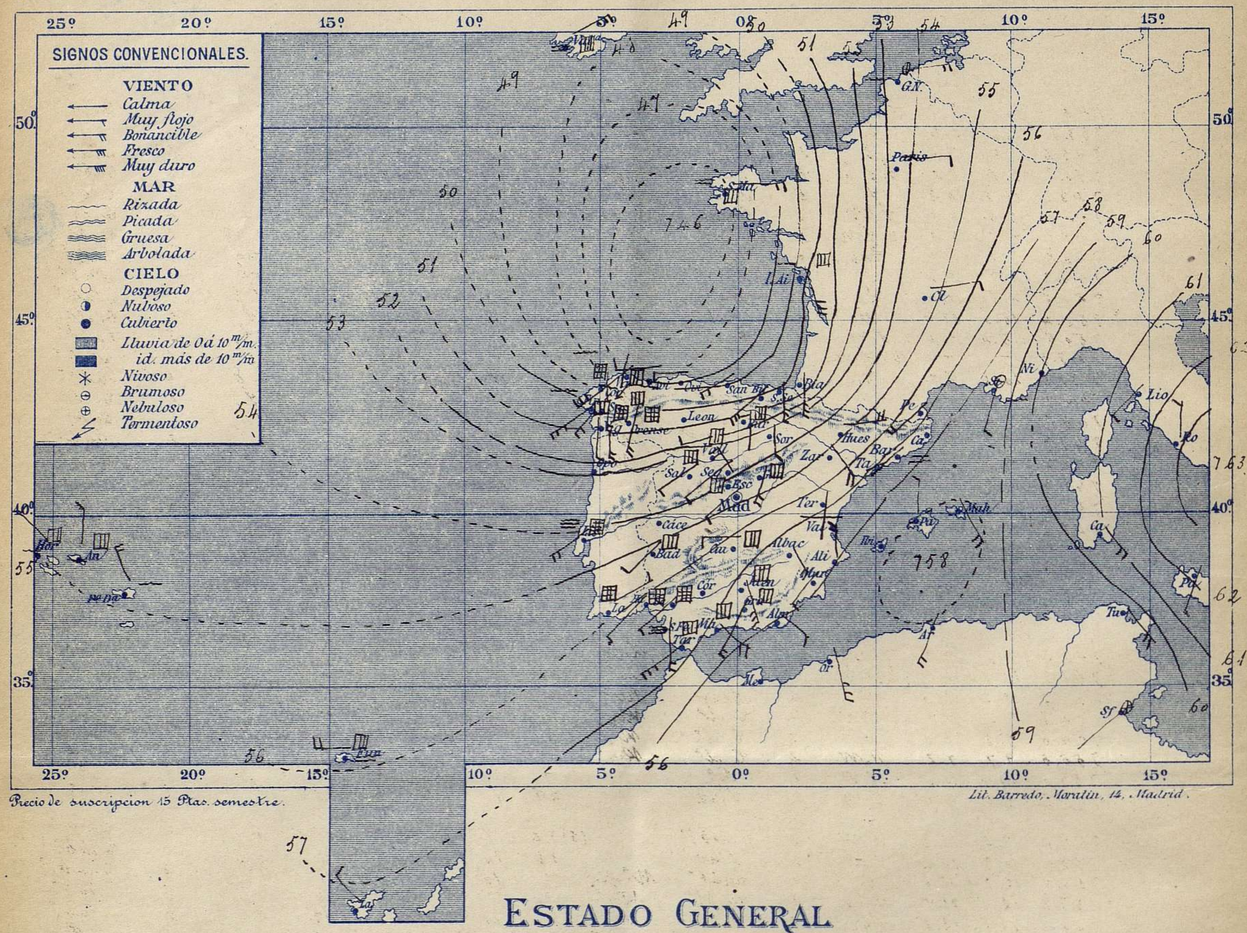
# INSTITUTO CENTRAL METEOROLÓGICO

Año XII — Boletin del Lunes 7 de Marzo de 1904. — Nº 67



Precio de suscripcion 15 Ptas. semestre.

## ESTADO GENERAL

La borrasca de Galicia ha caminado hacia el N.E. y se halla hoy en plena bahia de Vizcaya al S.W. de San Vicente; su nivel ha bajado 3mm mas y su área de acción se ha ensanchado hasta Madera y las Canarias; las lluvias son muy copiosas en Galicia donde tambien han descargado tormentas muy violentas; en Andalucia persisten, asimismo, las lluvias abundantes y son menos intensas en el Centro; el tiempo es malo, en general, y las presiones se debilitan cada vez mas residiendo las mas elevadas en el S. de Italia. Ha cesado el frio y las temperaturas suben, sobre todo en la region de Levante; la máxima ocurrió en Málaga y fué de 21º.

## Tiempo probable

EN EL N. vientos bonancibles á frescos del 3er cuadrante y lluvias.
" " N.W. " frescos y duros del 3er cuadrante y lluvias.
" " CENTRO " bonancibles del 3er cuadrante y lluvias.
" " S. " " " " " " "
" " E. " " variables y tiempo incierto y lluvioso.
" " N.E. " " del 3er cuadrante y algunas lluvias.
