

En el Mediterraneo existe un área de presiones débiles relativas y otra al W. de las costas de Galicia. — Sueve en la región Cantábrica y en Galicia, con vientos flojos de dirección variable; en el resto de la Península el tiempo es bueno y los vientos son bonancibles por lo general del 4.º cuadrante. — Las presiones más elevadas residen por el Atlántico. — La temperatura máxima de ayer fue de 32.º en Sevilla y la mínima de hoy ha sido de 4.º en Leon. —

Tiempo probable.

EN EL N. Vientos bonancibles del 2.º y 3.º cuadrantes y tiempo incierto y nebuloso.

N.W. it it it it it it it it

CENTRO it flojos y bonancibles de dirección variable y buen tiempo.

S. it it it it it it it it

E. it it it del 3.º y 4.º cuadrantes y tiempo incierto.

N.E. it it it it it it it it
