

# INSTITUTO CENTRAL METEOROLÓGICO

Boletín del *Jueves 15* de Octubre de 1908

Año XVI

Nº 289

## ESTADO GENERAL.

Un área de bajas presiones relativas se halla en la bahía de Vizcaya produciendo lluvias en Galicia. Otra área de igual nivel se halla en Castilla la Vieja. Las lluvias son generales y abundantes en la Península; en Zaragoza se han recogido 93<sup>mm</sup> de agua, en Alicante 34 y en Murcia 23<sup>mm</sup>; tambien se registran varias tormentas. Los vientos son bonancibles a frescos por lo general del 3<sup>o</sup> cuadrante. Las presiones mas elevadas residen por el W. de las islas Canarias. La temperatura maxima ayer fue de 26° en Bilbao y Cornell y la minima de hoy ha sido de 7° en Cáceres y Ciudad-Real.

## Tiempo probable.
