

ESTADO GENERAL.

El área de presiones débiles situada en el Golfo de Vizcaya pierde intensidad y gana extensión; también se rellena con lentitud la depresión del Mediterraneo. El tiempo se ha mantenido tormentoso en el Centro N.E. y E de la Península Ibérica y acelajado e incierto en el resto, dominando en general los vientos bonancibles del 2º y 3º cuadrantes, con temperatura suave. La máxima de ayer fue de 26º en Sevilla y la mínima de hoy ha sido de 5º en Leon y Cuenca. Las mayores presiones residen sobre el centro de Europa.

Tiempo probable.

EN EL N. Vientos flojos y bonancibles del 2º cuadrante y buen tiempo
