MADRID, MIERCOLES 14 de JUNIO de 1.972

Dirección postal: Centro de Análisis y Predicción (Ciudad Universitaria), Apartado 285 - Madrid - 3 - (España) - Teléfono: 244 35 00
Fonometeo local: teléfono 094 - Fonometeo España: teléfono 232 69 40 de Madrid

TIEMPO PASADO (de 12 horas de ayer a 12 horas, T.M.G., de hoy):

Nubosidad y precipitaciones: Ayer hubo cielo cubierto o muy nuboso en toda la Península y Baleares. El predominio correspondió a las nubes de desarrollo vertical que dieron origen a numerosas tormentas en Ebro, Cataluña y Levante. Durante la noche y mañana de hoy disminuyó mucho la nubosidad en el sur y sudeste de la Península. Los registros más importantes han correspondido a las cabeceras del Duero y Ebro con 47 litros por metro cuadrado en Huesca y Vitoria y 37 en León y a Cataluña con 37 litros en Gerona.

Vientos fuertes: A las 12 horas en Almería soplaban un viento del Oeste de 40 Kts.

Temperaturas destacables. Ayer sólo se alcanzaron los 25° en Alicante, Murcia y Málaga y no llegaron a los 20° en Galicia y Cantábrico, con la excepción de San Sebastián, Duero, Ebro, Centro (salvo en Guadalajara), Extremadura y La Mancha. Hoy han sido numerosísimos los observatorios que han dado mínimas entre 7 y 10°. A las 12 horas la más alta correspondía a Murcia con 24° y la más baja a Avila con 6°.

PRONOSTICO PARA MAÑANA:

En Cataluña nubosidad abundante con chubascos que en algunos puntos serán de carácter tormentoso. En las demás regiones nubosidad variable con chubascos más frecuentes en los sistemas montañosos y regiones del Duero y Centro. Existe riesgo de que en algunos puntos sean de carácter tormentoso. Ligero ascenso de temperaturas.

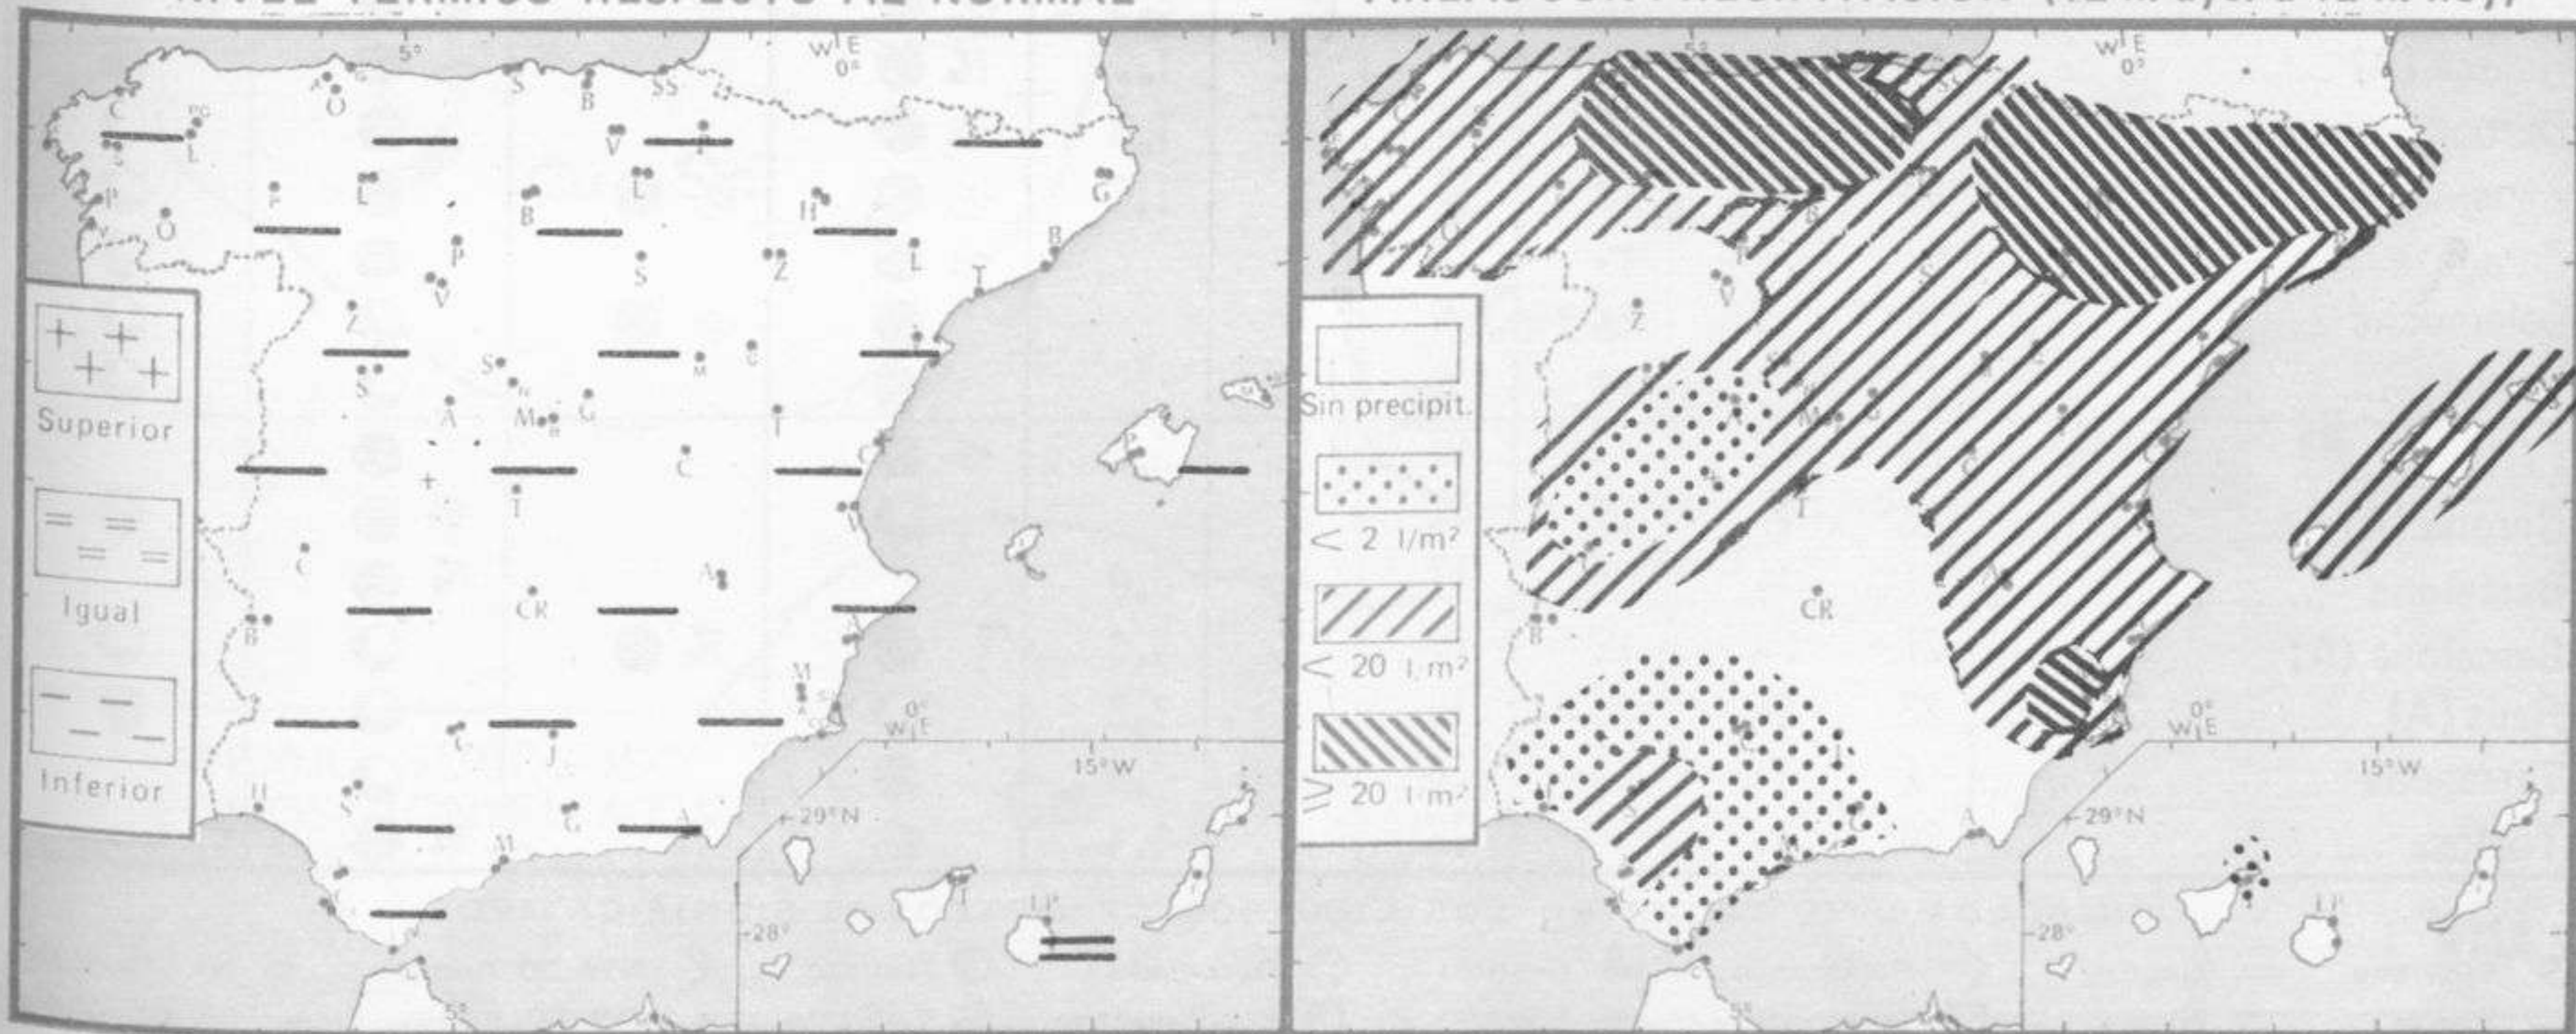

TENDENCIA PARA LOS DIAS16 y 17.....

Día 16: Continuarán los chubascos dispersos pero decreciendo en intensidad y frecuencia. Aumento de temperaturas.

Día 17: Chubascos en el Cantábrico y Andalucía y puntos muy aislados de las demás regiones. Continuará el aumento de temperaturas.

NIVEL TERMICO RESPECTO AL NORMAL
